Outreach portal for Virtual Labs

User: Outreach Admin

Outreach portal:

For Outreach Admin

Not Solved

The screenshot shows the Outreach portal dashboard for an Outreach Admin. The header is orange and contains the Virtual Labs logo on the left and the user profile 'Outreach Admin' on the right. A left sidebar contains navigation links: DASHBOARD, ADD OUTREACH COORDINATOR, DOCUMENTS, CMS, and SETTINGS. The main content area is titled 'Dashboard' and shows a breadcrumb 'Home / / Dashboard'. Below this are five colored cards: 'WORKSHOPS RUN' (122), 'LABS TAKEN' (12), 'NODAL CENTERS' (21), 'NODAL COORDINATOR' (2), and 'OUTREACH COORDINATOR' (21). A callout box points to the 'NODAL CENTERS' card with the text: 'Get the labels right. Align them at the same level'.

Category	Count
WORKSHOPS RUN	122
LABS TAKEN	12
NODAL CENTERS	21
NODAL COORDINATOR	2
OUTREACH COORDINATOR	21

This screenshot shows the same Outreach portal dashboard, but with a callout box pointing to the left sidebar. The callout text reads: 'Issue with the side bar functionality. So always keep the side bar open, don't close it.' The sidebar is currently open, showing the navigation links: DASHBOARD, ADD OUTREACH COORDINATOR, DOCUMENTS, CMS, and SETTINGS. The main content area displays the same five data cards as the previous screenshot.

Category	Count

Outreach portal:

For Outreach Admin

The image displays two versions of the 'Change Password' form in the Outreach portal. Both versions feature a yellow header with the 'Virtual Labs' logo and a navigation bar with 'Home > Change Password'. The left version shows a form with three input fields: 'Existing Password', 'New Password', and 'Confirm Password'. The 'New Password' field is large and contains a series of dots. The 'Confirm Password' field has a hint 'Minimum 5 Characters'. Below the form are 'Save', 'Reset', and 'Cancel' buttons. The right version shows a similar form but with a smaller 'New Password' field and a hint 'Min 5 characters'. A red line points from a text box below to the 'New Password' field in the left version.

Make the text field about 12 character long, its too big currently, leading to user thinking they have to make the password as long as possible as there is upper limit mentioned.
